EDUCATION

Lyceum of the Philippines University - Cavite **September 2022 - August 2026**
Bachelor of Science in Computer Science

WORK EXPERIENCE

NOAH Business Aplications **June 2025 - August 2025**
Quality Assurance Intern

- Conducted functional testing on business applications, verifying system reliability and ensuring compliance with quality standards prior to release.
- Identified, documented, and communicated software defects, facilitating timely resolutions and enhancing overall product quality.
- Designed and executed test cases in accordance with Business-Ready Technology Standards (BRTS), validating application behaviors for compliance with organizational requirements.
- Validated system outputs and user workflows against business needs, ensuring accuracy and a seamless end-user experience.
- Collaborated with development teams to identify issues and suggest enhancements, contributing to improved software solutions.

PROJECTS

DengueGuard: ARIMA-LSTM, K-Means Clustering, and Flexible Farrington Algorithm for Dengue Outbreak Early Warning

- Led documentation efforts for a software engineering thesis, ensuring comprehensive records throughout the development lifecycle.
- Prepared and maintained the research manuscript, detailing system requirements, methodologies, and testing procedures with clarity.
- Established standardized documentation practices, enhancing collaboration and facilitating knowledge transfer within the team.

COVID-19 Data Exploration

- Analyzed COVID-19 datasets using Microsoft SQL Server to identify trends in infection rates, mortality rates, and vaccination progress across countries and regions.
- Developed SQL queries using Joins, CTEs, Temporary Tables, Window Functions, and Aggregate Functions to clean, transform, and analyze large datasets for meaningful insights.
- Created SQL Views and performed data type conversions to prepare structured datasets for efficient reporting and visualization.
- Designed an interactive Tableau dashboard to visualize COVID-19 trends, compare infection and death rates, and communicate key findings through data-driven insights.

CERTIFICATIONS, SKILLS, & AWARDS

- **Skills:** MySQL, Microsoft Excel, Python, Microsoft PowerBI, Tableau, MS Office, Jira
